[code]for{life}	UKS2-S8-1
Name:	Rapida
Class:	Router

Evaluate your partner's challenge

Is the task fun and appealing? Is the route challenging? Could you use a repeat loop to solve it? Are traffic lights included? Do you have to write code in Python? Do you have to use a forin range loop? Do you have to use 'while' loop? Could you use 'elif' and/or 'else'? Do you need to define and call a procedure? Do you have to create your own variable in Python?	Evaluation criteria	Yes/no	Comment
