Python Planner Sheet

Rapid Router

Coding reminder:

Remember to use indents where needed.

```
v.move_forwards()
v.turn_left()
v.turn_right()
while not v.at_destination():
if v.is_road_forward():
elif v.is_road_right():
else:
```

To create a repeat loop:

```
for count in range(n):
```

use any name for count, and the correct number for n

To define a procedure:

```
def procedurename():
```

use your own word in place of procedurename

To call your procedure

```
procedurename():
```

My Code in Python for Level

```
import van
v = van.Van()
```
